

CHORE-TIME® Drinking System Management Tools

Let's grow together®

Simplify Drinker Management with Chore-Time's Breather Cap, Folding Stand Tube and PDS™ Control

Folding Stand Tube:

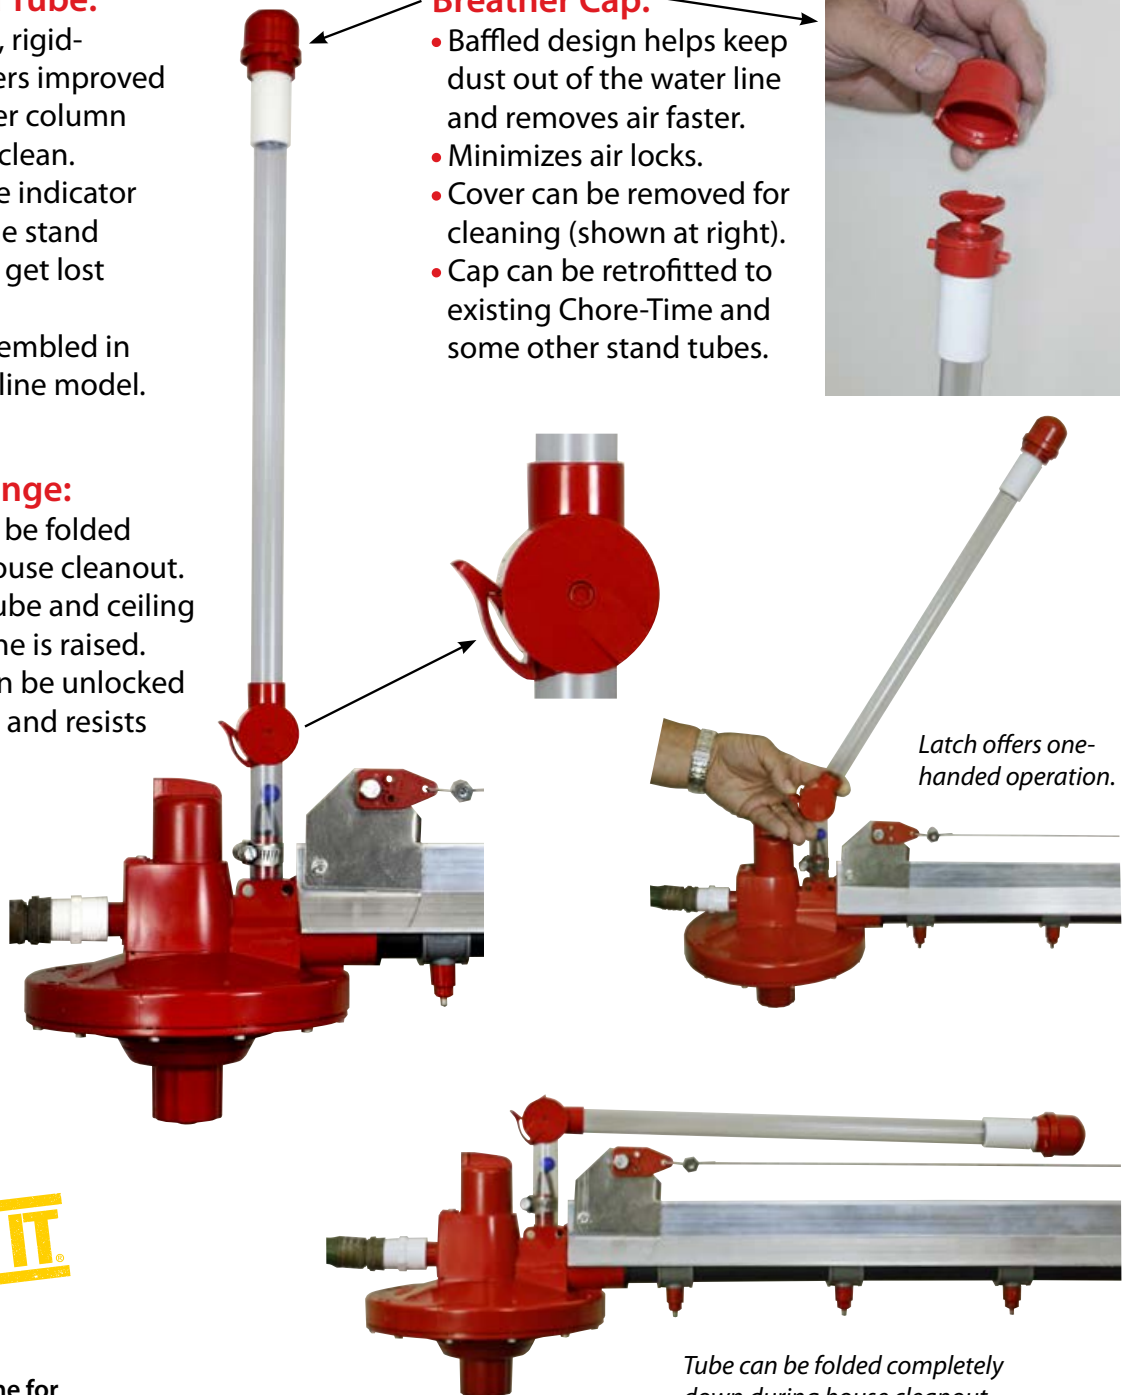

- Large-diameter, rigid-plastic tube offers improved visibility of water column and is easier to clean.
- Easy-to-see blue indicator ball is held in the stand tube so it won't get lost or dropped.
- Comes fully assembled in an end- or mid-line model.

Stand Tube Hinge:

- Permits tube to be folded down during house cleanout.
- Protects both tube and ceiling when drinker line is raised.
- Robust latch can be unlocked using one hand and resists bird activity.

Breather Cap:

- Baffled design helps keep dust out of the water line and removes air faster.
- Minimizes air locks.
- Cover can be removed for cleaning (shown at right).
- Cap can be retrofitted to existing Chore-Time and some other stand tubes.

Latch offers one-handed operation.

Tube can be folded completely down during house cleanout.

Count on Chore-Time for experience, reliability, performance and confidence.

Stand Tube Options

All stand tube styles are now available with Chore-Time's Breather Cap.

Folding Stand Tube features a latch for folding the tube over prior to winching up the drinker line.

Rigid Stand Tube for use in applications where drinkers are not winched to the ceiling or building has high ceilings.

Flexible Stand Tube can be bent over and tied down when drinker line is winched up.

PDS™ Controls for RELIA-FLOW® and STEADI-FLOW® Drinkers

Chore-Time's PDS™ (Pneumatic Drinking System) Controls offer poultry producers convenient control of the water pressure in all nipple drinker lines in the house.

- Change the pressure in all lines or flush all lines from one remote location.
- Program PDS Controls to automatically flush water lines as often as four times per day or as seldom as once a week.
- Easily run "flush stimulations" to get cool water to the birds during hot weather.
- PDS™ Control models available: up to 16, 32, 64 and 80 regulators.

*Easy-to-Program Control for up to 16 Regulators
A model for up to 80 regulators is also available.*
