

SignalPro™ Universal Control Pan

Attracts Birds to the Control Pan

Let's grow together®

Chore-Time's SignalPro™ Universal Control Pan is a single solution regardless of floor feeder system used. Control Pan facilitates consistent feed flow and flock performance. Choose from either Sensor or Mechanical Control Pan options.

SignalPro™ Universal Control Pan Benefits

- **Universal Design** – Attaches to most Chore-Time feeding systems. Eliminates need to stock multiple control pan feeder types and service is simplified to one type of control pan.
- **Integrated LED Light** – Birds are attracted to LED light, so they eat more from the control pan and helps ensure that feed is delivered to the rest of the line.
- **Modular Switch Design** – Easy retrofit between simple mechanical switch or higher tech sensor options.
- **KONAVI® based Design** –
 - Low pan height allowing birds easy access to feed from day one.
 - Angled cone with anti-rake fins discourages birds from stepping into the feeder and scratching feed out of the pan with their feet or beaks.
 - Design helps keep feed clean and uncontaminated – improving feed availability and feed efficiency.
 - Simple hinge and locking mechanism that allows easy removal and installation of the pan to the excluder.
- **Streamlined Design and Engineering** – Provides reliable performance and easier maintenance.

SignalPro™ Universal Control Pan with LED light attracts birds to the control pan. More feed gets eaten from the control pan by increasing bird activity there.

Count on Chore-Time for experience, reliability, performance and confidence.
